

AFTER CARE

THESE GUIDELINES MUST BE FOLLOWED FOR ULTIMATE RESULTS

- 1. Avoid washing hair for 48 hours after application
- 2. To maintain warranty and quality of your Seamless1 extensions, use products from the approved S1 range
- 3. Do not use any shampoo that contains oils and or silicones and preferably sulphate free options (if you decide not to use the S1 Range) Please remember the S1 range has been formulated especially for extensions. PLEASE NOTE: Seamless1 South Africa cannot take responsibility for wrong advise given by your stylist to you regarding after care products. All stylists have the full knowledge about our products.
- 4. Cutting, colouring and the use of colour shampoo on the extensions, void the warranty.
- 5. Do not apply conditioners, treatment and or serums to or near the tapes to prevent slippage
- 6. It is your responsibility to apply our Seamless1 serum and or leave in cream on a daily basis.

 Preferably twice a day, minimum once a day.
- 7. The serum may be used on wet or dry hair, please note, if serum is not used, extensions will dry out as the extensions do not have roots and our bodies feed our natural hair daily, however they cannot feed the extensions as they do not have roots. Applying the S1 serum daily is vital for optimal use of the extensions.
- 8. If swimming, apply S1 leave in cream or S1 serum, tie or braid your hair. After swimming rinse off your hair and reapply S1 leave in cream or S1 serum. Avoid chlorine water to protect your colour and condition of the extensions. Salt water is extremely drying for hair. Same procedure for sea water as the above.
- 9. Brush your extensions with the S1 care brush or a detangler, 3 times a day, gently holding the tapes while brushing for less pressure on your natural hair
- 10. Do not leave your hair wet and tie it up, this will be too heavy for your natural hair and can also cause the tapes to curl up at the ends as well as cause slippage.
- 11. A heat protector is an absolute MUST. Do not blow dry, iron or curl your hair without a thermal protector applied. If you do not use a Heat Protector your hair will dry out and it can also affect the colour (Exactly the same as your natural hair). Do not apply heat onto your tapes/panels. If excessive heat is used on the hair, Seamless1 will not be held liable.
- 12. We recommend to have your extensions removed and reapplied between 6-10 weeks (depending on hair grow)
- 13. Ask your stylists for tips on how to style your hair
- 14. After washing and or swimming make sure you only brush your hair when its 90% dry, do not brush your hair when its wet,
- to avoid unnecessary pulling on your natural hair
- 15. Tie your hair up when you sleep to avoid pulling at the tapes during the night.
- 16. We recommend to purchase a silk pillow case for a softer wear while you are sleeping
- 17. LOVE YOUR HAIR YOU LOOK GORGEOUS
